

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

PREFACE.

THE pleasure of constructing Chess Problems is, in itself, a fair equivalent for the time and pains which a careful composer must expend, but it is to the interest shown by solvers that he must look for encouragement, and their approval is his best reward.

As a contributor for several years to the principal Chess columns and magazines, I have had the benefit of much kindly and valuable criticism, not less kindly, nor of less value, when it has been opposed to my own fancies; and I now venture to offer to the Chess public a selection from those problems which have stood the test of

publication, in the hope that what has been to me a labour of love, may be acceptable to some of those, at home and abroad, who take delight in the quaint and manifold combinations which no number of games or problems can exhaust.

It may be true that a composer is not a good judge of the merits of his work, but it is not less true that he can best appreciate the difficulty of combining clear construction with some subtlety, and freshness of idea. He knows well "where the shoe pinches," and he must often take strong measures to guard against flaws, or to prevent second solutions. These meet him face to face, though they seldom present themselves to the notice of the solver after they have been overcome by the introduction of pieces condemned, perhaps, as unnecessary by the off-hand critic.

This charge of overloading the position is not always un-

I

reasonable and there are few composers who do not at times deserve it. As in other matters ** Prevention is better than cure/' and he shews far truer feeling for his art who prevents the faults of a position by careful reconstruction, by working down his problem, and refining it, than he who with less trouble cures by coarser means the false results.

Such high finish is, however, more easily aimed at than attained; it must be looked for, as a rule, in the admirable work of those few who stand as problem composers a clear head and shoulders above us all.

It has been my good fortune to meet on friendly terms many members of the Brotherhood of Chess; others are familiar to me from their masterpieces, which reflect with such variety the distinct and characteristic conceptions of their minds:—To all I offer heartily, -^with this litde book, the New Year's greeting—" Peace, health, and happiness."

A. CYRIL PEARSON.

Drayton Parslow Rectory, December f 1878.

PREFACE TO THIRD EDITION.

OFFER, with much pleasure, to the Chess public a new edition of my problems. To the hundred originally included in the book have been added a few that have been lately composed and published. Among these will be found a four-move problem (Problem A) which took the double-first prize in the " Chess Monthly Problem Tournament, 1882." The judges, Messrs. Zukertort, Healey and Collins, say of this problem in their final award " the gem " of the set and the Tournament; the originality and beauty ** o/ the leader render this problem worthy of a place in the ** choicest selection of compositions by the greatest masters^

This problem obtained its honors against sets sent in from Germany, Denmark, Sweden, America, Austria, Brazils, Australia, India, Greece and France, a result of which I, as an English composer, feel that I may be justly proud.

A. CYRIL PEARSON.

Drayton Parslow Rectory, April, 1883.

Replace the White Kt at B 7, and a Black Pawn at K 4 ; then P takes P en pas. Mate.

ANALYSIS AND PROOF.

It can be proved that Black's last move mus/ have been P from K 2 to K 4, so that White may take the P en pas.

The Black King cannot have moved from any ^{^ff} «//<?</square.
(The White Kt now occupies B 7.)

Nor from Kt 3 or 4, as both are now doubly guarded,. so that he cannot have moved out of a check,

(The White Kt now helps to guard Kt 5.)

Nor can he have moved from K 2, as the White P on Q 6 cannot have moved to give check.

No other P can have moved.

The K P cannot have moved from K 3, because of the position of the White King.

Therefore Black's last move must have been P from K 2 to K 4, which White can take en pas., giving Mate.

OPINIONS OF THE PRESS.

*(

Mr. Pearson's compositions are distinguished by originality and ^aceful fancy, and no amateur should be without this little record of liis work in the poetry of Chess."— Illustrated London News, April, 1883.

" Mr. Pearson's problems are uniformly correct, as well as elegant ^nd classical. We commend them to the notice of the problem-loving community."— Sporting and Dramatic News, April, 1883.

'*We have pleasure in recommending the work to all problem Jovers."— British Chess Magazine, April, 1883.

" *One Hundred Chess Problems,* by Rev. A. Cyril Pearson, is a ^vell printed and tastefully got up book, worthy of a place on the drawing-room table, as well as in the library. Mr. Pearson evidently delights in simple and pleasing stratagems, but there are many indications in

his work that he by no means lacks the ability to construct difficult and complicated problems. In publishing this collection Mr. Pearson has proved himself a perfect master of the lighter style of composition."— *Sporting and Dramatic News*, May, 1879.

" Among the three-movers are a considerable number which, without being particularly difficult, are yet extremely pleasant to solve, either on account of their piquant subjects, skilful workmanship, or (as often happens) both qualities combined. Being generally more intent upon pleasing than puzzling, our author has, on that very account, produced a book all the more likely to be widely popular. A word of praise is due as well to the neat and tasteful exterior as to the typographical excellence of this little volume."—*Huddersfeld College Magazine*, 1879.

OPINIONS OF THE PRESS— [continued).

" We may say of the two-movers that they are excellent. There are some fine compositions in the three move class. We may specially commend No. 89, a four-mover. The book is cheap and well got up."— *The Field*, 1879.

** A neat little volume by a composer of known merit. The problems are distinguished by happiness of conception and elegance of construction."— *Illustrated London News*, 1879.

" The Rev. A. Cyril Pearson has distinguished himself by gaining the prize for the best problem in the tournament, and also the prize for the best four-mover. Mr. Pearson's four-mover surpasses all his previous compositions, and is justly pronounced a masterpiece by our most eminent authorities."— *Sporting and Dramatic News*, Jan, 20th 1883.

[The problem thus referred to appears as problem A in this third edition.]

" A third edition of the Rev. A. Cyril Pearson's " Hundred Chess Problems" is being printed by the Civil Service Publishing Co., Salisbury-court, Fleet-street, E.C., price 2s. 9d., post free. This

announcement is of itself a sufficient commendation. The fact of this being a third edition shows that Mr. Pearson's elegant productions are appreciated by the chess community. That Mr. Pearson, though less liberal than formerly towards problemists, has by no means lost his old skill, is evinced by the fact that a four-mover of his lately carried off a double first in the Chess Monthly Problem Tournament. This production, together with a few problems lately composed, will be included in the forthcoming volume. As a collection of good problems essentially of the modern school, we commend the book to the notice of that body of fresh and rising composers which is now making itself conspicuous."— Land and Water, April 7, 1883.

** We are informed that a third edition of " 100 Chess Problems," by Rev. A. Cyril Pearson, is in course of preparation by the Civil Service Publishing Co., 8, Salisbury-court, Fleet-street, which will include a few problems lately composed, and a '* four-mover " which took the double first prize in the Chess Monthly Problem Tournament. The distinction achieved in the last-named event has given afresh impulse to the author's activity, and we hope to see his once familiar name as a problemist again before the public."— The Field, April, 1883.

JUST PUBLISHED,

Third Edition, Crown 8vo. Cloth, Price 2s. 6d., post free. -la. 9d.

100 CHESS PROBLEMS,

By THE REV. A. CYRIL PEARSON, M.A.,

of Batiol ColUje, Oxford, and Sector of Vraylon FartloK, Snrlr, With Some new ones, among them the celebrated Four-move Problem which was awarded the Double Prize in the Chess Monthly Tournament, 1882, and of which the judges, Messrs. Zukertort, Heale; and Collins, BSj ID their final award " that it is worthy of a place in the choicest selection of compositions by the greatest masters."

" Mr. Pearxm's compodtions are disiingtiMed by oriffinalil;/ and graceful /aiicy, and no amateur should be vrilhout ihia little record of bin iBor*™iAi!poe(rso/c*«3»."— IlldbttbAiedLondohNews, April H, 18ft3.
